Why Choose Us?

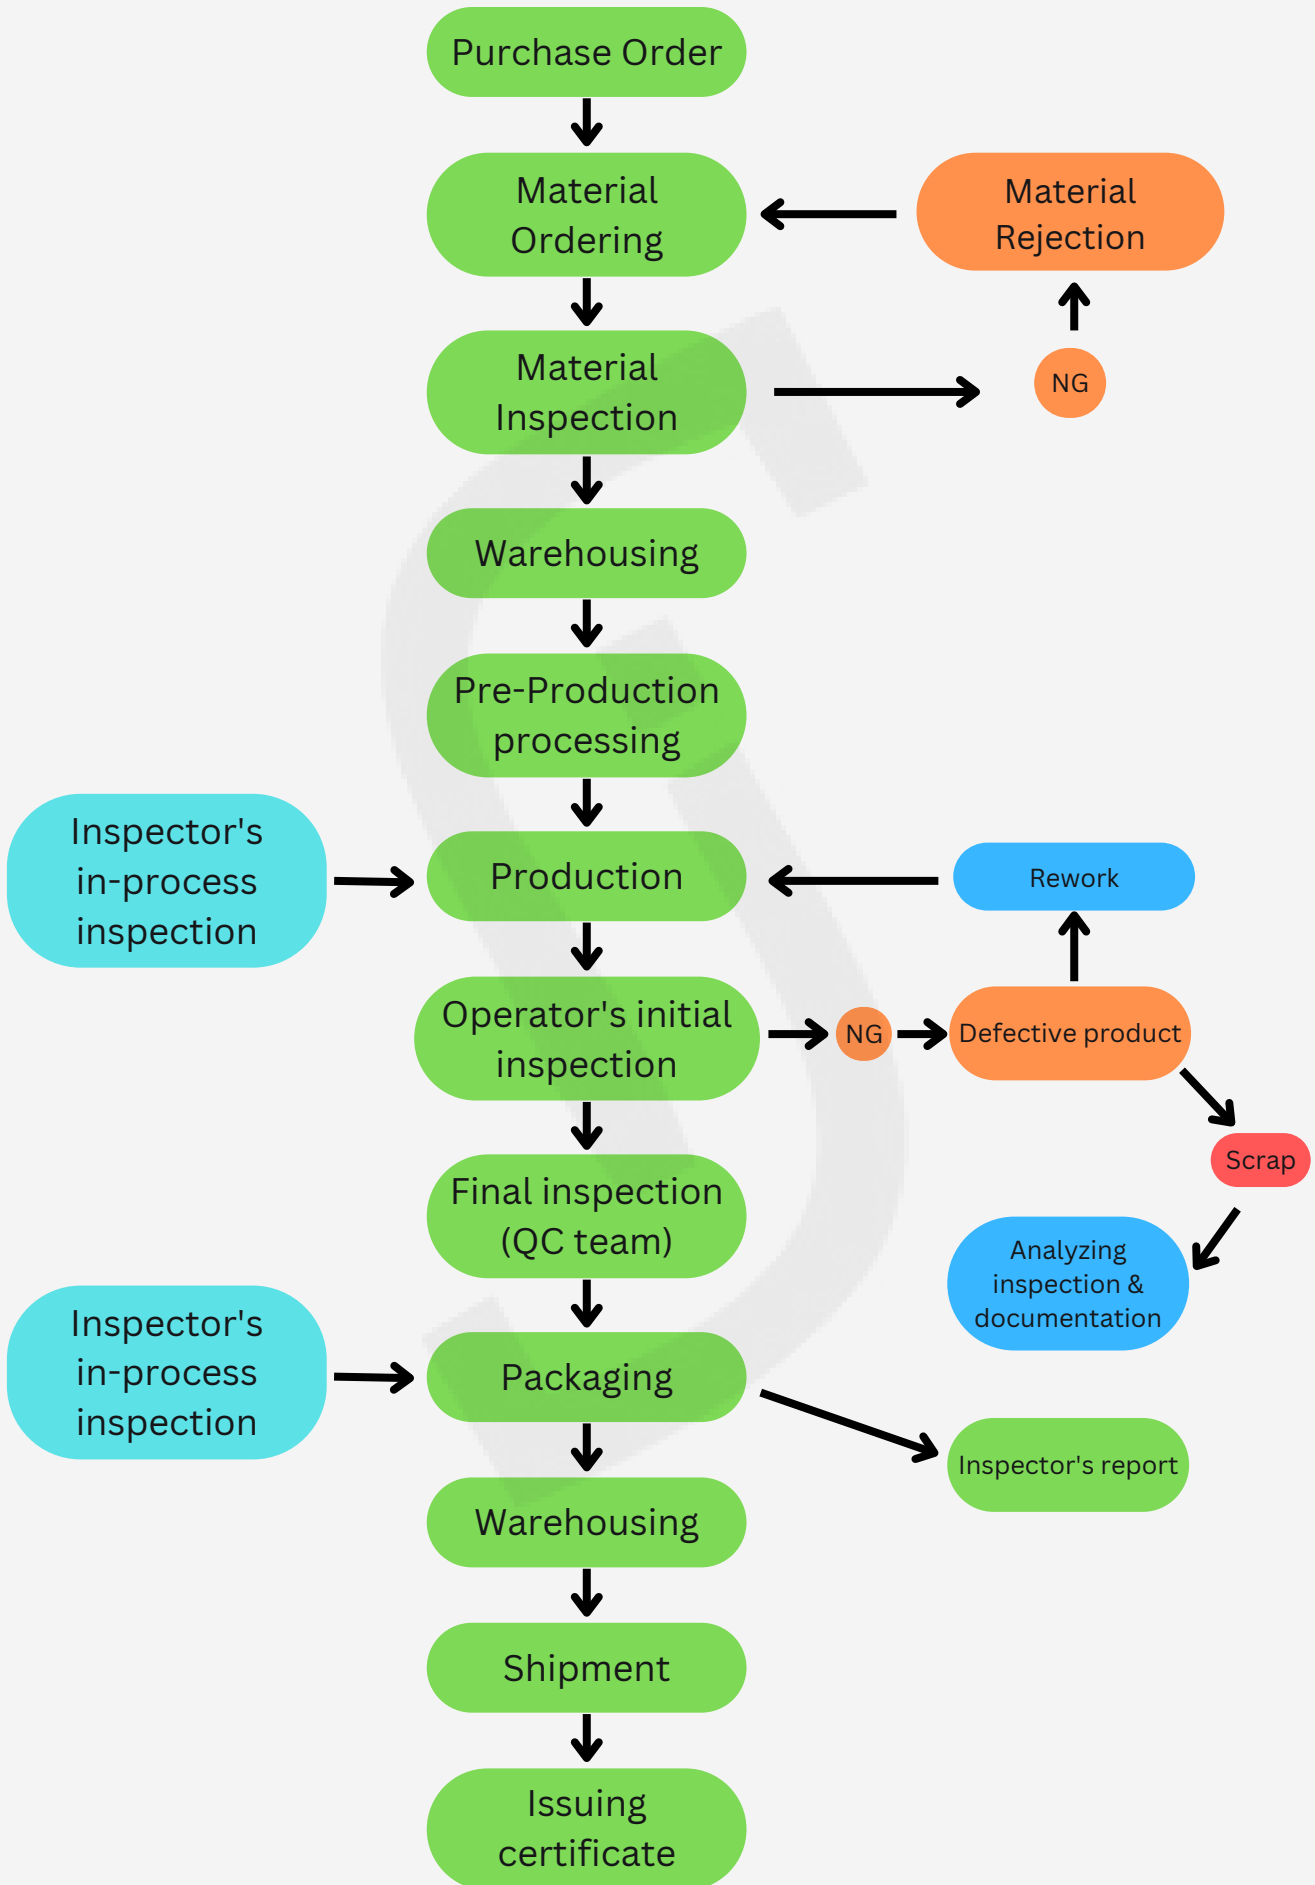

- 27 years of excellence
- ISO 9001: 2015 certified company
- High-speed production capacity & excellent capabilities
- Custom manufacturing solutions
- Zero defect policy
- Holy trinity of Quality, Service and Competitive Pricing
- Confidentiality at the core of business
- On-Time delivery
- Vendor managed inventory (VMI)
- 100% satisfaction guarantee

Vendor managed inventory (VMI)

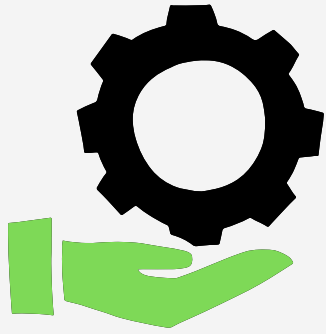

Benefits of VMI

- Avoid being out of stock in products critical to your end customer needs
- Improve your company's inventory replenishment process & help boost productivity
- Save money on stock levels & reinvest capital back into your business
- Avoid waste & reduce loss associated with disproportionate stock levels
- Simplify purchasing & streamline the ordering system

Services we provide

- Machining
- Turning
- Milling
- Drilling
- Grinding
- Boring
- Metal Injection Moulding
- Forging
- Assembly
- Finishing

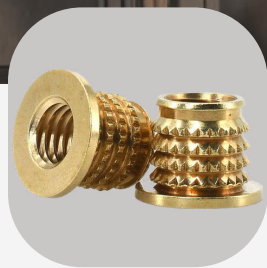

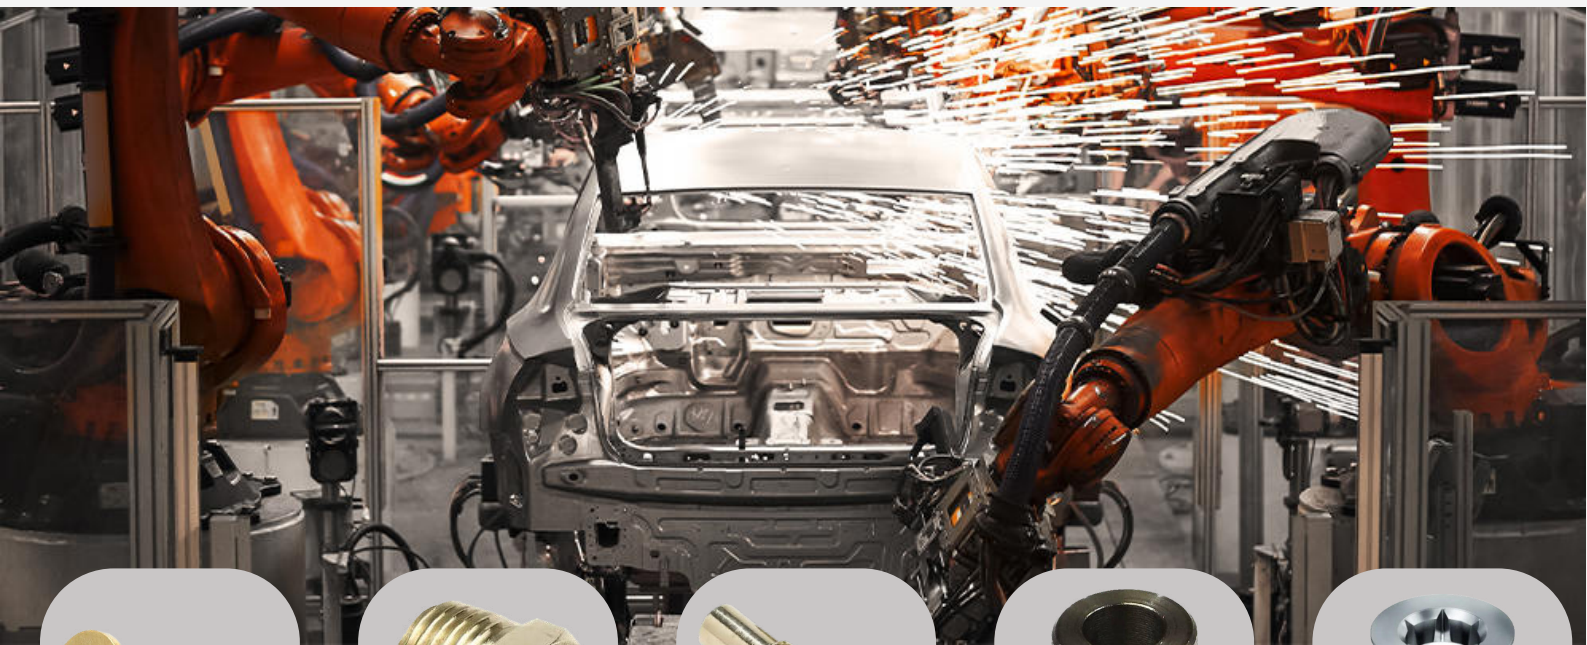

Plating Services

- Nickel
- Tin
- Silver
- Gold
- Copper
- Chrome
- Zinc
- Black Oxide
- Speciality treatment upon request

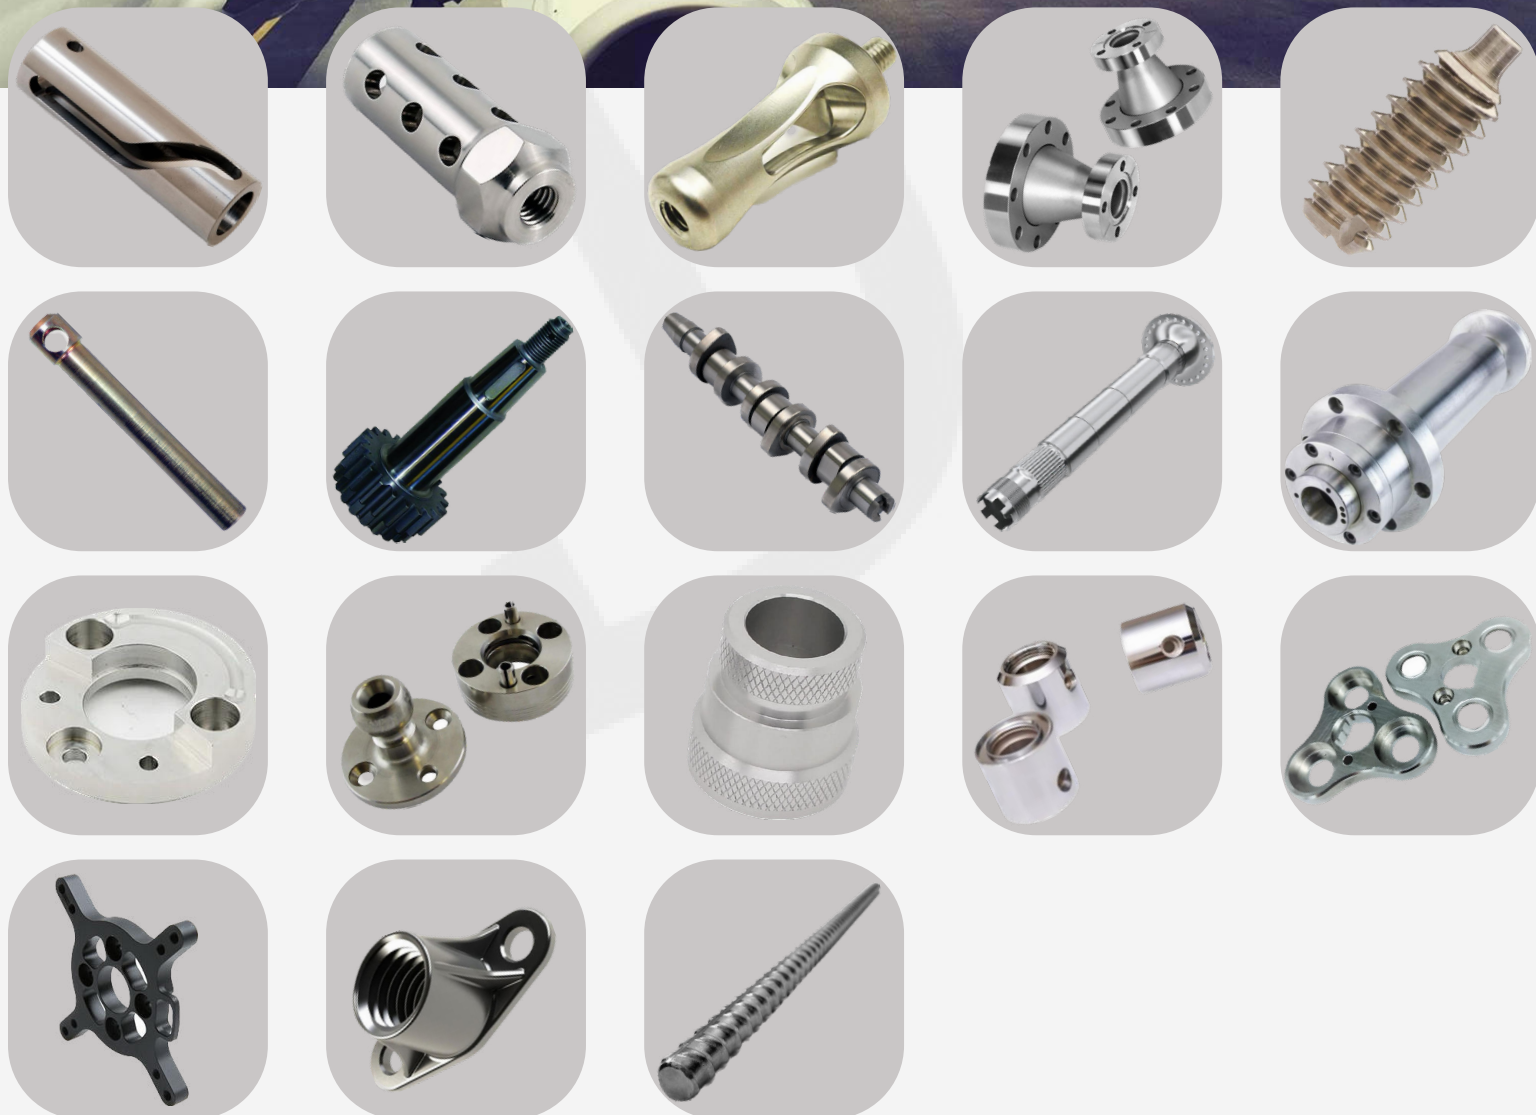

Stellar International is a tier-2 global manufacturer for automotive components. Our range of standards, certification, training and production capabilities help businesses throughout the automotive supply chain to be agile and continually improve. We can manufacture precision turned parts for Engine, Thermal, Fuel, A/C, Steering, Gear, Window & Seat adjustment systems and many other applications

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

Stellar International manufactures and outsource aircraft and aviation precision parts. We have been working with 3 aerospace companies currently and supplying high-precision components. Our products are compliant to aerospace industry standards like AS9100 (BS EN 9100) for quality management

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

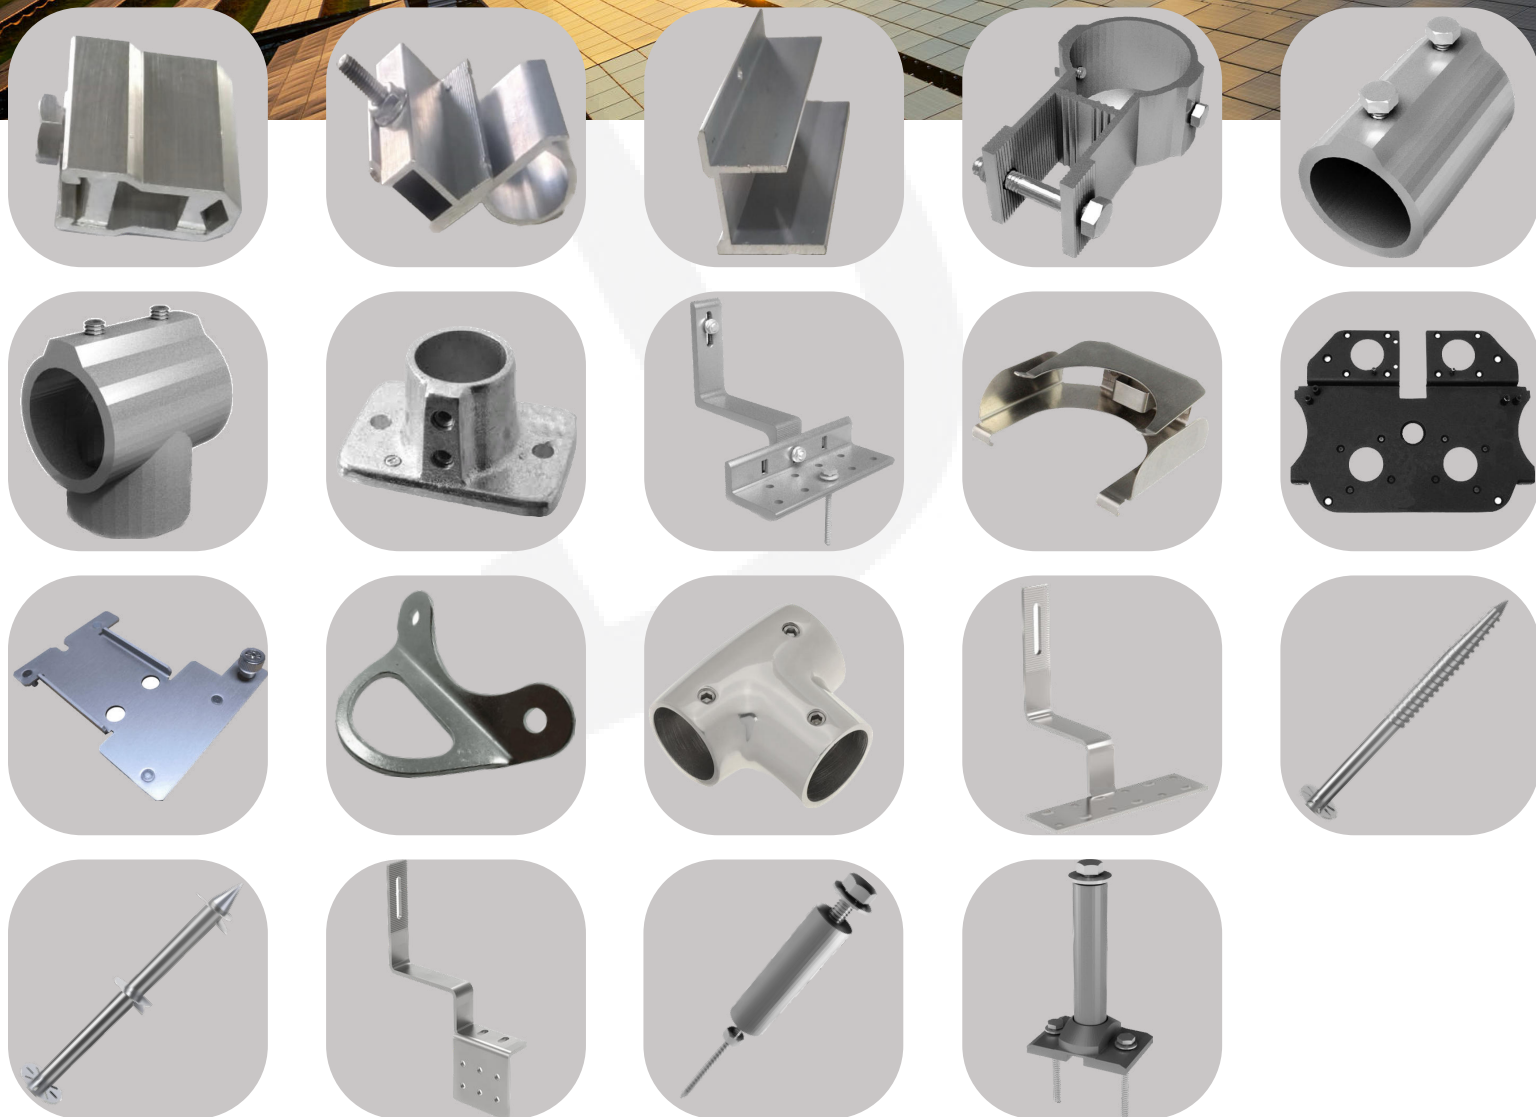

Stellar International plays a vital role in supplying electrical and electronic applications around the globe. We manufacture precision parts for plugs, switch, connectors, socket housing, terminal blocks, tooling, instrumentations, and many more applications. Our components are compliant with industry leading quality standards and certifications.

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

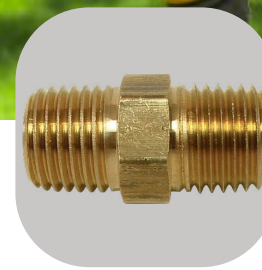

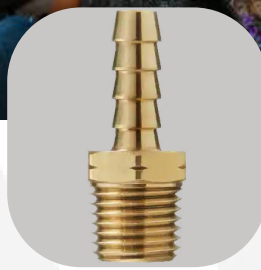

Stellar International is promoting and encouraging the development of renewable energy and reducing carbon footprints and hence we are actively supplying precision turned components for Solar and Windmill applications like mounting parts, pins, sheet metal parts and many more applications.

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

Our high precision capabilities can exactly meet your requirements for Hose and Garden fittings. We can manufacture lead-free products as per your demands. We help you select the correct hose, tubing and coupling allowing the processing system to be repeatable and reliable while reducing or eliminating costly downtime.

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

We manufacture high precision cable suspension system parts which are RoHS compliant and safety tested. Our applications are used in shopping malls for ceiling decors and lightings, modern homes and offices and many more modern infrastructure places.

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

General Precision Industrial Parts

Stellar International manufactures precision components with different quality standard compliance for many different industry sectors. From smallest child part to big studs, we got you covered for your requirements with the highest quality, excellent service and competitive pricing.

Note: we can design anything exactly as per your required specifications with technical drawings and/or globally recognized product code.

Industries we Serve

- Refineries
- Oil & Gas
- Engineering
- Nuclear & Thermal
- Automotive
- Aerospace
- Electrical & Electronics
- Garden & Hose
- Cable Suspension System
- Solar
- Metro
- Railway
- Infrastructure
- Construction
- Agriculture
- Public Transportation

Machinery List

- CNC machining centre
- CNC Turn mill
- CNC sliding head machine
- Manual Turning machine
- Automatic Turning machine
- Auto/Manual Threading & milling machine
- Lathe 162mm
- Drilling machine
- Tapper machine
- Punching machine

Precision Capabilities

- Diameter ranging from 1mm - 250mm and length from 1mm - 400mm.
Tolerances on Dia +/- 0.001 & +/- 0.002
- Lot sizes from 500 pcs to millions
- Wide range of material choices such as Brass, Stainless Steel, Steel, Copper, Bronze, Aluminium, Gunmetal

Contact us!

“ We love coffees and always welcome opportunities to serve the best again and again.

Contact us to discuss your next project with us today! ”
